SUMMARY

Data Analyst with 3+ years of experience specializing in turning complex data into actionable insights. Results-driven, go to person for creating dynamic dashboards that deliver key insights and support strategic decision making.

WORK EXPERIENCE

LatentView Analytics, Sr. Data Analyst, Chennai, India

Client: Visa Inc

September 2026 - Present

- Contributed to the development of a **Machine Learning-based Account Engagement Scoring model** for B2B marketing team, enabling data-driven engagement prioritization across **500 accounts**.
- Developed and enhanced a **Tableau Content Performance dashboard** adopted by **80% of the marketing team**, enabling stakeholders to monitor content performance and derive actionable insights.
- Leveraged **Tableau Pulse** to surface automated insights and accelerate interpretation of key marketing metrics, improving accessibility of analytics for business stakeholders.
- Automated **weekly and monthly reporting workflows using Python**, reducing manual effort and saving approximately **10 hours per week**.

Client: Blue Shield California

September 2025 - August 2025

- Designed and implemented a fully automated end to end reporting pipeline, significantly reducing manual effort, and turn around time
- Built and deployed real time **Tableau dashboards** by integrating with Databricks, enabling data driven insights and stakeholder visibility
- Migrated legacy SAS code to scalable Databricks-based pipelines, improving performance, maintainability, and process efficiency
- **Interviewed 15+ candidates** during the hiring process for the team and mentored and led juniors on projects.

Deloitte & Touche LLC, Data Analyst, Florida, USA

Client: Meta Platforms Inc.

July 2021 - June 2024

- Developed interactive **BI dashboard** to visualize key metrics such as completion rates, defaulters and ticket volumes, enabling leadership to track progress and improve accountability.
- Maintained and **optimized automation codebase to generate 4000+ tickets** for stakeholders to perform access reviews for **300+ groups** to streamline compliance and reduce manual intervention.
- Identified delays in access reviews by analyzing user behavior and root causes, leading to targeted outreach and the creation of a support forum to resolve recurring issues.
- **Led 6 independent projects** while mentoring new team members and managing parallel work streams, fostering team collaboration and boosting productivity.

ACHIEVEMENTS

- **Skills:** Tableau, Claude Code, PostgreSQL, Python, Looker Studio, A/B Testing, Machine Learning
- **Certifications:** Tableau Certified Desktop Specialist, Databricks Generative AI Associate, Databricks Data Engineering Professionals
- **Appreciation:** Received a Deloitte Applause Award for excellent client relationship building, recognized for ownership, learning speed, impactful work.
